2007-2010 Jeep JK Wrangler

3.0" Premium Plus "No Maintenance" Lift System for Jeep JK Wrangler 2/4 Door Model

Full-Traction Suspension introduces the newest in a series of superior engineered suspension systems for the Jeep JK Wrangler. Combining all the necessary components together in a 100% bolt-on package, this system will allow use of 35" tires with ease, superior flexibility, improved ride quality, and most innovative,

NO LUBRICATION MAINTENANCE !

Replacement front and rear upper control arms are manufactured from durable 1.5" x .188" wall DOM steel tubing and come equipped with fully serviceable flex joints and long lasting OEM style rubber bushings. This kit runs silent.

Quality laser crafted components allow proper fitment to make this system the one to choose for JK'ers demanding the best.

System comes complete with heavy duty adjustable front & rear track bar track for proper axle alignment, new generation front sway bar disconnects, rear sway bar links, bump stops, off-set brake line relocation brackets, and ride frequency tuned coil springs for a comfortable ride. Detailed installation instructions included with step-by step photos.

**Using recommended tire widths & wheel backspacing*
